

TelcoBridges is a Prix Excellence Finalist - Innovation Canada Category

Montreal, March 23, 2004: It was announced yesterday evening that **TelcoBridges Inc** is a finalist in the category of Canada Innovation in the annual South Shore Chamber of Commerce and Industry Prix Excellence 2004 competition.

Mr. Gordon Macfie, COO and CFO of **TelcoBridges** accepted the Finalist trophy on behalf of the company. "It is with great pleasure I accept this trophy, a first, as we are a new organization and have only been in existence since November 2002." he said. 'It is extremely gratifying that our local Chamber of Commerce has seen fit to single out our company in this category,' he continued: 'I also see this as a tangible symbol of recognition to our employees, which helps indicate to them that the truly innovative products they have worked so hard to create, are now being recognized as such by others; especially those who are not necessarily specialists in our market sector.'

The winners of the 2004 Prix Excellence, which are divided into 12 categories, will be announced on May 13, 2004 at the Dominique-Rollin Gala in Boucherville, Quebec.

About TelcoBridges:

TelcoBridges conceives, develops and supports high performance, technologically advanced telephony blades, which allow telecommunication system integrators to attain significant efficiency and affordability levels in the creation of their products and services.

The **TelcoBridges** solutions allow customers to position themselves advantageously against major telecommunication equipment manufacturers.

In addition, they shorten their time-to-market by utilizing innovative, cost-effective, state-of-the-art technology solutions on a blade™ which allows them to grow, when they want, within their means.
